M28 AIRCRAFT IN MARITIME PATROL CONFIGURATION

MPA configuration is designed to perform maritime patrol / surveillance operations. Basing on the long experience, PZL Mielec offers a platform for the sea and land reconnaissance system that meets the highest technological and tactical requirements. This patrol / surveillance airplane performs the following functions:

- protection of state, sea and land borders,
- securing transport sea and land routes,
- supervision of economic and military zones,
- search and rescue,
- support for natural disaster areas and humanitarian actions.

Our company offers special equipment for the above-mentioned missions like: EO / IR head, 360 deg radar, SLAR radar, IR / UV scanner, satellite communication and transmission, search light, life rafts, 1 ÷ 3 operator position and other agreed with the client. [Learn more.](#)
